Eco-Core Falcata Blockboard with MDF Faces
STORAGE AND HANDLING

SECTION 1 COMPANY IDENTIFICATION

Company Name	Global Ventures Australia Pty Ltd
Address	Unit 13 / 22 Beaumont Road Mount Kuring Gai NSW 2080 Australia
Phone	+ 61 2 9457 7171
Website	www.ecocore.com.au
Email	enquiries@globalventures.com.au

SECTION 2 STORAGE AND HANDLING

Storage	Sheets should be stored flat, preferrably in a slightly elevated 100% level platform in a clean and dry environment away from water, moisture, humidity and direct sunlight. It must not be subjected to extreme temperatures. Never store sheets upright or diagonally against a wall or table. When not working on them, it is best stored in the original packaging with cover sheets top and bottom until it is needed. Never leave sheets exposed without cover sheets.
Handling	When handling doors with veneered faces, be careful of any dust that may be sitting on the surface. They should be removed gently by using a soft and dry duster or micro fibre cloth. If the dust is rubbed into the surface it can become embedded in the surface and leave a mark. When not working on the sheets always store flat as instructed above with cover sheets top and bottom, never leave the sheets exposed.

SECTION 3 GENERAL INFORMATION

	Doors for paint finish or veneered doors finished with a clear lacquer or similar - apply an even coating of seal/paint/lacquer as soon as possible on all faces and edges with a product that prevents moisture penetration, this will result in a more stable door. Never leave panels exposed. **IMPORTANT NOTE:** THE MAIN CAUSE OF PANELS/DOORS BOWING, CUPPING OR WARPING IS WHEN ONE FACE OF A DOOR PANEL IS EXPOSED TO MORE HUMIDITY OR HEAT THAN THE OTHER FACE, YOU MUST AVOID THIS AT ALL TIMES.

If you have any concerns regarding this please contact Global Ventures Australia before proceeding any further.
